

# AABIP PULMONARY PROCEDURES REGISTRY

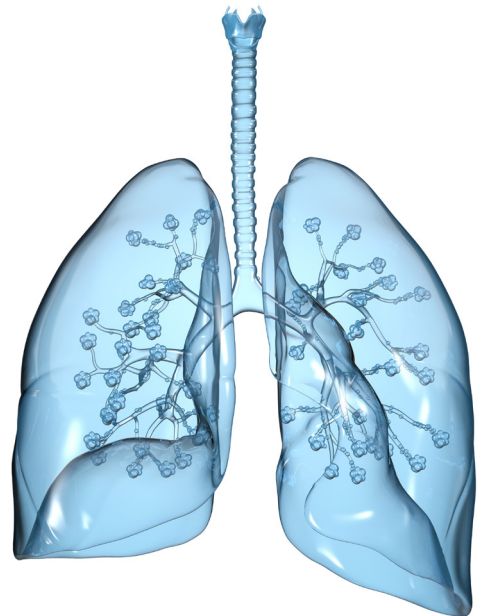

POWERED BY **eon**

**Deep understanding of patient outcomes starts with high-quality data. And high-quality data starts with you.**

Participate in the AABIP Pulmonary Procedures Registry, powered by Eon, to help you and fellow practitioners:

- Improve pulmonary procedure outcomes.
- Benchmark procedural data.
- Understand how to improve quality.

If you represent an entity performing pulmonary procedures – including hospitals, physician practices, and outpatient surgical centers – please support this initiative to set higher standards for patient care.

Choose the level that's right for your program:

STANDARD	ENHANCED	ENHANCED + EON
Participant enters data manually and gains full access to the Registry.	Adds EMR integration for automated data entry.	Adds Eon Patient Management, the market leader in incidental nodule identification and lung cancer screening management.
All plans include the ability to export your own patient data at any time, and all come with training and support so you can make the most of this opportunity.
